

Tubular Skylight Dimmer Accessory Unit

*Get Just the Right Amount of Light
in Your Home or Office*

Our newly redesigned dimmer allows you to let in as much or as little sunlight as you need. It's the perfect accessory for tubular skylights installed in bedrooms and home theaters. It also works great in corporate settings for media rooms and conference rooms where tubular skylights are installed.

- ▶ Available for our 10, 13, 18, and 21 inch diameter models
- ▶ Internal dimmer design restricts more than 99.75% of available sunlight
- ▶ Two-directional motor can be used in low voltage or high voltage settings
- ▶ Three position wall switch (not included) allows for the dimmer to be stopped at any angle from fully open to fully closed
- ▶ UL Listed with a 5-Year Warranty on motor and components
